Funding for this training was made possible (in part) by grant number 1U79SM05938-01 from SAMHSA. The views expressed in written conference materials or publication and by speakers and moderators do not necessarily reflect the views, opinions, or policies of CMHS, SAMHSA, or HHS; nor does mention of trade names, commercial practices, or organizations imply endorsement by the U.S. Government.

ASIST is designed to help all caregivers become more willing, ready and able to help persons at risk. Suicide can be prevented with the help of prepared caregivers.

Just as "CPR" skills make physical first aid possible, training in suicide intervention develops the skills used in suicide first aid. ASIST is a two-day intensive, interactive and practice-dominated course designed to help caregivers recognize risk and learn how to intervene to prevent the immediate risk of suicide.

The workshop is for all caregivers (any person in a position of trust). This includes professionals, paraprofessionals and lay people. It is suitable for mental health professionals, nurses, physicians, pharmacists, teachers, counselors, youth workers, police and correctional staff, school support staff, clergy, and community volunteers.

ASIST is designed to help all caregivers become more ready, willing and able to help persons at risk. Prepared caregivers can help prevent suicide.
