COMMUNITY/CONTINUING EDUCATION DEPT. OGLALA LAKOTA COLLEGE

The Community/Continuing Education Department began as the Adult Education Department in 1973. The major component of the department was GED testing. In the years that followed, the department grew to include community education, life coping skills workshops, adult basic education and GED tutoring. This was translated into Lakota Language as "Tiospaye Iciyohikeya Wounspe," which means community and continuing education, which serves in the spirit of the mission and purposes of the College.

Community education is a philosophical concept that serves the entire reservation providing for all of the educational needs of its community members. It uses local resources to serve as the catalyst for bringing community efforts to meet their

needs in addition to developing a positive sense of community, improving community living, and develop the community process toward the goal of self actualization.

The C/C Ed. Dept. offers a program responsive to the needs of the people of the Pine Ridge Reservation. The department tutors are responsible for preparing students for taking their GED Tests. The institution provided for the student is on an individualized basis and set up to meet the individual needs of the student. Tutoring is provided at the district college centers. The majority of C/C Ed. Dept. Tutors are bilingual and live in the community they serve. The department offers lifelong learning through life coping skills workshops and continuing education.
